Paris City Guide

Paris, La Ville Lumière - City of Lights, is one of the few places in the world that lights this creative fire within me whenever I visit. There's a rarefied electricity in the air from all the artists, writers, and photographers from the past, present, and future that helped refine my creative passions. If you get the chance to go to Paris, please jump at it - you won't regret it!

Paris is also magical since it's the kind of place that exists in many people's minds long before they visit. Between images of the Eiffel Tower, the romantic Seine at night, and all the bustling parks in your head - you'll definitely want to check out our guide so you can get the most out of your trip to Paris!

HOTEL FABRIC

This converted textile factory is lovely and stylish nod to Paris's industrial past. The open and airy lobby has an inviting feel to it with its exposed brick walls, Eames chairs, and gigantic oak table. Located near the Marais and the Oberkampf bar scene - Hotel Fabric is nicely centrally located.
